

Christmas Lantern Contest - 5th & 6th Graders

It was a 'green' contest to see which team was able to come up with something really beautiful using recyclable materials.

The teams were decided, the date was fixed and the competition was on....

The students got together after school and at their homes to come up with ideas for their lanterns and then worked very hard to make their ideas become a reality.

Finally it was judgment day and Ms Fiona was asked to judge! Ms Fiona spoke to the inventors and told them how pleased she was they had decided to create their masterpieces from recyclable materials instead of simply visiting a store.

The masterpieces were so creative that there was a tie for 1st place.

1st Place went to 'The Nutcracker Lantern'. Anaiiz, John Paul, and Daniel used paper plates, leaves, wire, pipe cleaners and gold paint.

1st Place also went to 'The Pallet'. Tattiana, Joshua and Deanna created theirs using cardboard, paint, wire and colored string.

'The Awesome Holy Parol' was created by Jacob, Ian and Andy using wire, tinsel, vellum paper and pictures of themselves hanging on string.

'Starcoon' was the creation by Emily, Isaac and Eric who used a scarf, wires, and tissue paper. The name indicated that the end product looked like a cross between a star and a raccoon.

'The Star' was the brainwave of Kyle, Isaiah and Vienna who used badminton birdies, wire, glitter, paper, fabric, pom pom string, and lights.

'The Christmas Piñata' was fashioned by Ellen, Sydney and Ryan using wrapping & tissue paper, plates and wire.

'The Holy Star' by Aaron, Eddie, Samantha and Hannah was created by using wire, tinsel and ornaments.

CONGRATULATIONS TO OUR CREATIVE 5TH & 6TH GRADERS!
