

TECHNOLOGY CLASS

PRESCHOOL TK & KINDERGARTEN STUDENTS

In today's fast pace technology based world we believe it is imperative that students as young as 3 years old have access to working with computers and laptops.

Technology plays a positive role in children's **development** and **learning**. Through the use of **technology**, teachers have access to more innovative and improved **teaching** methods that allow them to promote **learning** and create an active **learning** environment for children.

At Oneonta, preschool students 3 years and older, meet twice a week in groups of 6 and work independently on their own Chromebook laptops monitored by a knowledgeable instructor.

Preschoolers learn skills such as learning the proper names of the parts of the laptop, how to use the mouse appropriately, correct finger placement, basic typing skills and educational games. It is a fun class and children eagerly await their turn to come to the lab. This class is part of our school curriculum and there is no extra fee.

1ST - 6TH GRADE STUDENTS

These students have a structured Technology class every week with each child working independently on their Chromebook laptops and monitored by instructors from Easy Cloud Solutions.

To place further emphasis on technology; elementary students will learn more about Google slides (like Power Point), Google Docs (like Microsoft Word), Wordpress for designing websites, Javascript coding to create shapes and games, cloud computing using Amazon Web Services (time permitting), cyber security, and the dangers of social media.

Through engaging applications, children develop their hand-eye coordination further.

- Learn typing skills
- Improves Language Skills.
- Higher Capacity for Visual Attention.
- Enhances Social Interaction Skills.
- Increases Motivation to Complete Tasks.
- More Dynamic Spatial Skills.
- Develops Problem Solving Skills.
- Expands Horizons.

This class is part of our school curriculum and there is no extra fee.
